### PROFESSIONAL SUMMARY

- I am an experienced Fullstack Developer with over 4 years in designing and maintaining RESTful APIs using Golang, PHP, and Node.js. I'm skilled in optimizing SQL queries and managing databases while implementing CI/CD pipelines. My background in Backend Developer and foundational knowledge in Machine Learning fuels my desire to contribute to high-performance applications. I'm seeking new challenges in Backend Development

### EXPERIENCE

#### **Back End Developer | PT. QLCOM SOLUSI BISNIS | 07/2025 – 10/2025**

- Migration Data User From 0 to 70% Success
- Make Monitoring Database And Server, And Alerting
- Development Moduls ERP Project
- **Tools** : PHP, Laravel, RabbitMQ, Postman, NodeJs, ExpressJS, Postgree, Redis

#### **Full Time Freelance | ERP Project | CV. Win Printing Surabaya | 07/2024 – 05/2025**

- Successfully decreased average API response times by 20%, from 900ms to 720ms, through code optimization and caching
- Optimized real-time data handling, processing over 30,000 transactions per day
- Engineered an order monitoring system to enhance operational efficiency
- **Tools** : Golang, PHP, Go Fiber, Laravel, RabbitMQ, Postman, gRPC, Go-Routines, NodeJs, ExpressJS, Typescript, Mysql, Redis

#### **Golang Developer | PT. MSBU Konsultan Indonesia (KSNi User) | 02/2024 – 07/2024**

- Integrated HRIS data with various services ensuring seamless data flow
- Identified and resolved critical bugs not detected by QA, improving software quality
- **Tools** : Golang, Go Fiber, RabbitMQ, gRPC, Swagger, Mysql, Redis

#### **Full Stack Developer | Ride Hailing | PT. AKU CINTA INDONESIA | 02/2023 – 12/2023**

- Implemented real-time driver movement tracking for enhanced operational visibility
- Designed storage and retrieval solutions for driver trip history
- **Tools** : Golang, Go Fiber, RabbitMQ, gRPC, Postman, Postgree, MongoDB, Redis

#### **Staff IT | Mamalyfe Apps | PT. MAMALYFE SELALU DI BERKATI | 02/2021 – 08/2022**

- Designed and implemented standardized API response architectures
- Integrated payment gateways and developed a real-time WhatsApp chat API.
- Contributed to management web app development using ReactJS
- Contributed to mobile app development using Flutter
- **Tools** : Golang, NodeJS, ExpressJS, Postgree, React Js, Typescript

### PROJECT

#### **Scheduling System**

- Engineered a teacher scheduling system achieving 99% accuracy
- Used Genetic Algorithms for conflict resolution within the scheduling mechanism
- **Tools** : PHP, Codelgneter, Mysql

#### **Ecommerce Project**

- Developed a product recommendation system using the Apriori algorithm
- Utilized one year of transaction data to directly impact sales performance
- **Tools** : PHP, Laravel, Mysql

### EDUCATION

UNIVERSITAS DINAMIKA, INFORMATION SYSTEM – S1 – GPA 3.34 (2016-2023)

SMK ANTARTIKA 2, Computer And Network Engineering - SMK (2013-2016)

### SKILLS

PHP (Yii, Laravel, Codeigniter), Golang(Echo,Fiber), NodeJS(ExpressJS), ReactJS, React Native, Flutter, Jquery, PostgreSQL, Mysql, MongoDB, Apache2, NginX, Google Cloud Platform, DigitalOcean, GIT (Bitbucket, Gitlab, Github), OS (Windows, Linux Ubuntu), Docker, CICD.

### CERTIFICATION

- Responsive Web Design | FreeCodeCamp | 08/2018

- JavaScript Algorithms and Data Structures | FreeCodeCamp | 04/2022
- Internal Programming 2nd place | Universitas Dinamika | 11/2018
